Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, surarital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

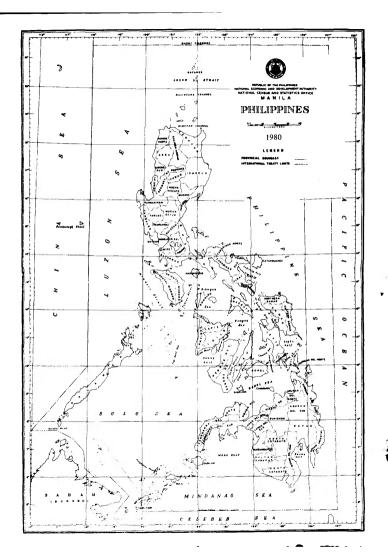

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government accommittees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is an order of the Commonwealth and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every oensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership; relationship to head, line number of mother, sex, date of birth, age as of last birthday and marial status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

Population Itame

In this publication, the population and households were described according to the respective items listed below:

Distriction Inc.

ropulation items	riousing items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

RARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery:
 - A market place or building where trading activities are carried on at least once a week:
 - A public building like a school, hospital, puericulture and health center or library.
- Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly nonfarming or fishing.

All areas not falling under any of the above classifications are considered

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- Persons whose usual place of residence is the place where the household lives and
 present at the time of visit of the enumerator, except those born after 12:01 A.M.,
 May 1 1980:
- Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad:
- students who usually go home to their respective households at least once a week;
- persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- Citizens of foreign countries who are Chiefs and officials of international organizations like UN, 1LO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbavan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who
 have been away or expected to be away from the Philippines for more than one
 year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like: military camps and others.

Most of these institutions house inmates for whom care or custody is provided by reachest staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- Son/daughter the head's own child, stepchild, or adopted child.

- Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following de finitions:

- a Single If never been married.
- b. Married
 Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to
 - the nature of work, illness or service in the Armed Forces.

 A person whose spouse died and who has not remarried at the time of enumeration
 - d. Separated If permanently separated from spouse either legally or otherwise, due to marital discord.
 - e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
 - f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

LISUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- A residential building (house, apartment or accessoria, condominium) that was vacant;

- Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation:
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- Duplex a structure intended for two households, with complete living facilities
 for each. It is divided either vertically or horizontally into two separate dwelling
 units which are usually identical.
- Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accessoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural - any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6 Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- Hotel, lodging house, domitory, etc. This group comprises permanent structures
 which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding
 houses, domitiories, pensions and lodging houses fall within this category.
- Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows.

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- Asbestos
- Cogon/nipa
- Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
 - 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

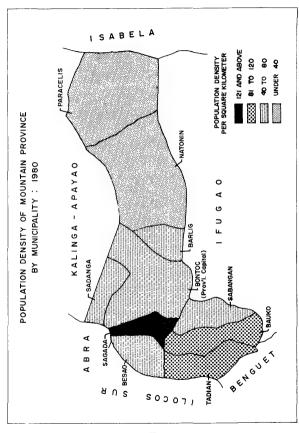

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior wails of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

Mountain Province: A Brief Analysis

Mountain Province, created by virtue of Republic Act Number 4695 on June 18, 1966 lies between the regions of Ilocos and Cagayan Valley. It is bounded on the north by Kalinga-Apayao, on the south by Ifingao, on the west by Ilocos Sur and on the east by Isabela. Situated northwest is the province of Abra, while southwest is the province of Benguet. As the name suggests, Mountain Province is characterized by a terrain which is very mountainous, ruseed and rolling.

Tourist spots abound in the province, like the Sagada caves famous for its mummies, the hot salt spring in Barangay Mainit, Bontoc and the "Enchanted Eel" in Kagubatan, Tadian. The province is also rich in natural resources. Deposits of gold, copper, lead and other minerals are found in some of its municipalities.

Mountain Province is composed of ten municipalities with Bontoc as the provincial capital.

POPULATION

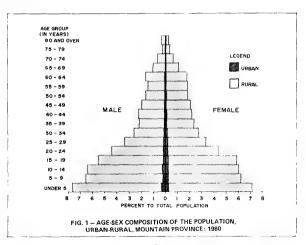

The population of the province registered at 103,052 in 1980 with 51,452 males and 51,600 females. Mountain Province was one of the least populous of the 73 provinces, ranking 69, although its annual geometric growth rate was observed to increase by 1.63 percentage points, from 0.21 percent in 1975 to 1.84 percent in 1980. With a land area of 2,097,3 square kilometers, population density would be 49.1 persons per square kilometer if the population were evently distributed.

Although a steady increase in the proportion of urban residents is noted, the bulk of the population still live in the rural areas. For this, 99,166 or 96.23 percent of the total population remain rural dwellers. Classified according to urban-rural residence and sex, the breakdown of the population of Mountain Province for the three censal years is shown below:

A BRIEF ANALYSIS

TABLE A – POPULATION BY URBAN-RURAL RESIDENCE AND SEX, MOUNTAIN PROVINCE: 1970, 1975 AND 1980

	1980		19	75	1970	
Area Classification and Sex	Number	Percent	Number	Percent	Number	Percent
Total	103,052	100.00	94,096	100.00	93,112	100.00
Male Female	51,452 51,600	49.93 50.07	47,211 46,885	50.17 49.83	45,898 47,214	49.29 50.71
Urban	3,886	3.77	3,460	3.68	2,930	3.15
Male Female	1,799 2,087	1.75 2.02	1,676 1,784	1.78 1.90	1,414 1,516	1.52 1.63
Rural	99,166	96.23	90,636	96.32	90,182	96.85
Male Female	49,653 49,513	48.18 48.05	45,535 45,101	48.39 47.93	44,484 45,698	47.77 49.08

Sex ratio (number of males per 100 females) of the population in general registered a slight decrease, from 100.70 in 1975 to 99.71 in 1980, with the females predominating over the males. Both the urban and rural population showed decreases in sex ratio at 93.95 down to 86.20 and at 100.96 to 100.28, respectively.

The rural male and female population from the group of persons under 5 years of age to 80 years and above decrease as the group becomes older. On the other hand, the urban male and female population deviate from the usu. "pyramid co-figuration. Specifically, deviation from the pyramid formation is more pronous." d among "nales.

AGE COMPOSITION

The population of the younger age group (0-14 years) accot its for 40.07 percent of 1980 population of the province. Although demonstrating a downward trend, it remains at a high level. Correspondingly, the proportion of older persons (65 years and over) is on the upward swing. From 3.75 percent in 1970, it increased by 0.33 percentage point in 1975 and by 0.35 percentage point to 4.61 percent in 1980. Persons belonging to the productive age group (15-64 years) constitute 55.32 percent of the provincial population.

A comparison of age composition of the population in three censal years is shown below:

TABLE B – AGE COMPOSITION OF THE POPULATION, MOUNTAIN PROVINCE: 1970, 1975 AND 1980

	19	80	1975		19	970
Age Composition	Number	Percent	Number	Percent	Number	Percent
Total	103,052	100.00	94,096	100.00	93,112	100.00
0 - 14 years	41.290	40.07	39,248	41.71	41,552	44.63
15 64 years	57,010	55.32	51,006	54,21	48,066	51.62
65 years & over	4,752	4.61	3,842	4.08	3,494	3.75

The province as a whole is progressively growing older as shown by the continuous rise in its median age, 16.46 years in 1970, 17.31 years in 1975 to 18.15 years in 1980 and in its aged-child ratio (the number of elderly per 100 children) increment of 3.10 percentage points in a span of ten years or 1.72 percentage points in a five-year period to its 11.51-elderly-for-every-100-children ratio.

The increase in the percentage of persons in the productive age group coupled by the decrease in the number of young people resulted in a decline in the dependency ratio. In 1970, 93.72 dependents were being supported by the working populace and in 1975, the dependency load was reduced to 84.48. In 1980, the number of dependents aged 0 to 14 and 65 and over supported by the working populace 15-64 years declined further to 80.76.

The rural dependency ratio differed by as much as 8.71 from the urban ratio brought about by the "aging" (i.e., growing older) of the population in the rural area. As a consequence, the rural workers were more burdened than their urban counterparts.

MARITAL STATUS

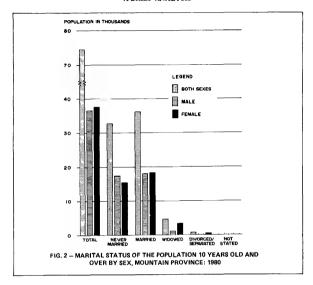

The proportion of married individuals fluctuated from 49.76 percent in 1970, down to 46.92 percent in 1975, then up to 48.58 percent in 1980. The effect is reflected more on the increase of the proportion of married men than that of women, 48.96 percent from 46.57 percent in 1975 and a decrease from 50.03 percent in 1970. Never married men followed the same pattern: 47.25 percent in 1980 compared with 1970 and 1975 proportions of 45.60 percent and 49.74 percent, respectively.

Widowed persons and those divorced or separated, respectively, increase 0.21 and 0.19 percentage point covering up their decrease in 1975. The proportion of widowed persons decreased by 0.54 percentage point in 1975 then rose to 6.41 percent, a slight increase of 0.21 percentage point. That of the divorced or separated followed the same unstable trend, 0.92 percent in 1970 then dropped to 0.75 percent in 1975 and rose to 0.94 percent in 1980.

Table C presents the population ten years old and over by sex and marital status for three censal years.

TABLE C – POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, MOUNTAIN PROVINCE: 1970, 1975, AND 1980

Sex and	1980		19	975	1970	
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	74,585	100.00	67,501	100.00	64,014	100.00

Not stated	63	0.17	20	0.06	54	0.17

HIGHEST GRADE COMPLETED

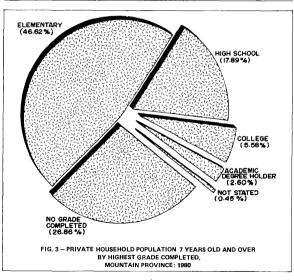

In Mt. Province, more and more people have realized and felt the need for higher learning to improve their socio-economic condition. This attitude of the people was manifested in the increased proportions of those who reached the secondary level (13.34% to 17.89%), collegiate level (3.45% to 5.58%) and of those who held academic degrees (2.23% to 2.60%) and the corresponding decrease in the proportion of those who reached the elementary level (52.85% to 46.62%). Those who had no formal education, on the other hand, had a very slight increase of 0.07 percentage point to 26.86 percent while the number of those who did not report educational attainment declined in its proportion (0.89 percentage point short of the 1975 proportion of 1.34%).

The females registered a higher proportion of college students (6.24%) and academic degree holders (3.24%). Likewise, the females also registered higher proportions of persons who had no schooling at all (31.88%). Elementary (41.91%) and secondary (16.31%) schoolers on the other hand, have smaller proportions than the males.

For the males, the following were revealed: 21.73 percent were non-recipients of formal education; 51.45 percent, elementary schoolers; 19.53 percent and 4.90 percent

TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS AND OVER BY HIGHEST GRADE COMPLETED, MOUNTAIN PROVINCE: 1975 AND 1980

1980 1975 Highest Grade Completed Number Percent Number Percent Total 82,373 100 00 75,312 100.00 No grade completed 22,128 26.86 20,177 26.79 Elementary 38.405 46.62 39.801 52.85 High school 14.739 17.89 10.050 13.34 College 4.597 5.58 2.595 3.45 Academic degree holder 2.137 2.60 1.678 2.23 Not stated 367 0.45 1,011 1.34

attained secondary and collegiate levels, respectively, and 1.93 percent finished a degree. Males who did not disclose their educational attainment totalled 0.47 percent, nearly the same as the female proportion of 0.42 percent.

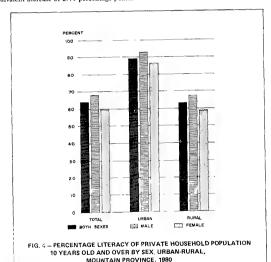

Of the 38,405 persons with elementary education, 31.27 percent made it to the sixth grade or higher while the rest finished the first to fifth grade only. For those enrolled in the secondary level, 66.37 percent finished only the lower years while the remaining percentage went through fourth year.

Less than a quarter or 21.06 percent of those who entered college attended fourth year or higher, while 78.94 percent finished at most the third year.

The distribution of the private household population 7 years old and over according to highest grade completed in the last two censal years is shown in Table D.

LITERACY

Literate population of Mountain Province in 1970 constituted more than half or 61.60 percent of the total provincial population. After ten years, it reached 64.01 percent or an equivalent increase of 2.41 percentage points.

xxvii

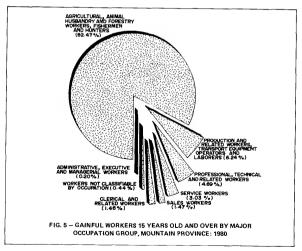

The accessibility to more schools in the urban areas contributed to its having a higher proportion of literates than its rural counterpart, 89.32 percent for the urban and 63.02 percent for the rural. In the urban areas, there were 42.37 percent male literates and 46.95 percent female literates while in the rural areas, 33.30 percent were male literates and 29.72 percent were female literates. In general, the males have a higher literacy rate of 68.19 percent compared with the females' 59.95 percent.

LANGUAGE OR DIALECT

At least 18 languages and dialects were reported spoken with Kangkanai as the mother tongue of 11,277 private households or 53.27 percent of all private households in the province. Bontoe is spoken by 36.61 percent, Ilocano by 5.53 percent and Gaddang by 2.57 percent. In the urban areas, only five dialects are commonly used, these are: Bontoe (59.66%), Ilocano (31.93%), Kangkanai (5.78%), Tagalog (1.97%) and Ifugao (0.66%). Bontoe is the only spoken dialect in Sadanga.

GAINFUL OCCUPATION

Mountain Province has a total of 40,238 gainful workers aged 15 years old and over. This is 65.32 percent of the total number of private household population 15 years old and over engaged in gamful and non-gainful occupations.

xxviii

Agricultural, animal husbandry and forestry workers, fishermen and hunters top the list of gainful workers comprising 82.47 percent of the total. Compared to 1970 and 1975, it is 1.31 and 4.86 percentage points lower, respectively. Second, with a very slight increase of 1.98 percentage points are production and related workers, transport equipment operators and laborers. Third in the list are professional, technical and related workers (4.69%). Steadily decreasing in proportion are administrative, executive and managerial workers, from 0.54 percent in 1970 to 0.28 percent in 1975 and 0.20 percent in 1980. This last category workers are the least to be found in the province. The urban areas turn out more non-gainfully employed workers, (43.95%), compared to the rural areas with 34.31 percent. The urban areas produce more service workers while the rural areas as expected have mostly agricultural, animal husbandry and forestry workers, fishermen and hunters.

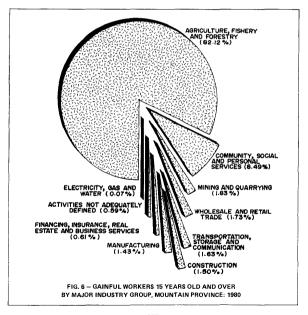

Comparative changes in the proportion of workers engaged in various gainful occupation from 1970 to 1980 are reflected in the following table:

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, MOUNTAIN PROVINCE:
1970. 1975 AND 1980

Major	198	1980		1975		1970	
Occupation Group	Number	Percent	Number	Percent	Number	Percent	
Total	40,238	100.00	<u>41,464</u>	100.00	41,325	100.00	
Professional, technical and related workers	1,888	4.69	1,413	3.41	1,518	3.67	
Administrative, executive and managerial workers	80	0.20	115	0.28	222	0.54	
Clerical and related workers	589	1.46	517	1.25	433	1.05	
Sales workers	590	1.47	535	1.29	711	1.72	
Service workers	1,219	3.03	714	1.72	621	1.50	
Agricultural, animal husbandry and forestry workers, fishermen and hunters	33,183	82.47	36,210	87.33	34,623	83.78	
Production and related workers, transport equipment operators and laborers	2,511	6.24	1,768	4.26	3,066	7.42	
Workers not classifiable by occupation	178	0.44	192	0.46	131	0.32	

INDUSTRY

More than four-fifths or 82.12 percent of the gainful workers of private household population in Mountain Province derive their sustenance from agriculture, fishery and forestry, but mainly on agricultural crop production which comprise 98.61 percent of this group. Community, social and personal services although second in rank account for only a small portion (8.49%). Education services, (37.75%), public administration and defense (23.92%) and personal and household services (17.01%) are the three leading sources of employment in the group. The rest of the major industries have less than 2 percent each to their credit: mining and quarrying (1.83%); wholesale and retail trade (1.73%); transportation, storage and communication (1.63%); construction (1.50%); manufacturing (1.43%); financing, insurance, real estate and business services (0.61%); activities not adequately defined (0.55%) and the least electricity cas and water (0.07%).

MIGRATION

Out of the 87,563 persons 5 years and over, 96.32 percent resided in the same municipality where they had resided on May 1, 1975 while 2.59 percent moved across provincial boundaries (inter-provincial migrants) and 1.00 percent changed their municipalities but stayed within their home province (intra-provincial migrants). Only a slight percentage of the population were residents outside the country (0.09%). The males (1.41%) out-numbered the females (1.18%) in terms of inter-provincial migration. On the other hand, intra-provincial migrants had equal proportions of females and males, at 0.50 percent each.

TYPE OF BUILDING

Single houses are occupied by most (98.34%) of the 21,169 households of Mountain Province. Other types of building are occupied by an insignificant number of households, an aggregate of 351 households or 1.66 percent. Commercial/industrial/agricultural building, barong-barong and other housing unit (natural shelter, boat) are entirely occupied by rural dwellers. In contrast, hotel, lodging house and dormitory occupants are solely urban dwellers.

The table below presents the housing conditions of households in Mountain Province for 1970 and 1980:

TABLE F – NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, MOUNTAIN PROVINCE: 1970 AND 1980

	198	0	19	1970		
Type of Building	Number	Percent	Number	Percent		
Total	21,169	100.00	19,347	100.00		
Single house	20,818	98.34	18,943	97.91		
Duplex	57	0.27	179	0.92		
Apartment/accesoria/condomi- nium/row house/etc.	143	0.68	85	0.44		
Improvised (barong-barong)	95	0.45	73	0.38		
Commercial/industrial/agri- cultural	20	0.09	65	0.34		
Other housing unit: natural shelter, boat, etc.	5	0.02	_	_		
Hotel, lodging house, dormito- ry, etc.	10	0.05	_	-		
Institutional (hospital, convent, school dormitory, etc.)	21	0.10	2	0.01		
Other collective living quar- ters (military camp, etc.)			***	-		

TYPE OF OCCUPANCY

Of the 21,169 households in Mountain Province, 91.10 percent own the units they occupy. Rural dwellers who are owners themselves have relatively high proportion over their urban counterparts. Almost all (99.27%) of the households in single house type of building are owners (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

More than two-thirds (67.41%) of the total households have galvanized iron for their roofing while 0.14 percent utilize tile/concrete/brick/stone, 0.05 percent asbestos, 31.95 percent cogon/nipa, 0.38 percent makeshift/salvaged materials and 0.07 percent other roofing materials.

A high proportion of urban households (99.34%) have dwelling units roofed with strong materials (galvanized iron/aluminum, tile/concrete/brick/stone and asbestos) while only a little less than two-thirds (66.42 percent) of the rural households have dwelling units built with roof of the same materials.

Walls made of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, asbestos) are used by 86.54 percent of the households (Table 2).

YEAR BUILT

More than one-sixth (17.09%) of the total households occupy dwelling units built in 1976-1980; 15.76 percent, during 1971-1975; less than one-fourth (21.82%) in 1961-1970; 21.75 percent, 1951-1960; 12.42 percent, 1942-1950 and 11.16 percent of the households live in structures built before the Second World War (Table 2).

FLOOR AREA OF DWELLING UNITS

Majority of the households (64.27%) live in dwelling units with floor area of less than 30 square meters; 25.66 percent, 30.49 square meters; 5.74 percent in units 50.69 square meters and 2.74 percent in units 70-99 square meters in floor area. The affluent ones (1.59%) have spacious dwelling units with 100 square meters and over (Table 3).

TENURE OF OWNER OCCUPANT WITH RESPECT TO THE LAND

Out of 19,285 households owning their dwelling units, 91.77 percent of them also own the land where the structure is erected. The remaining proportions are as follows: 2.88 percent, lessee or sublesses; 0.18 percent, farm lessee/agricultural tenant of landowners; 2.02 percent, other legal tenure and 3.15 percent have no tenure (squatter, etc.) (Table 4).

KIND OF LIGHTING FACILITIES

Kerosene still remains the most common type of lighting facility being used by 66.48 percent of the 21,169 households. Others such as candle or wax is used next by 28.27 percent of the households. Electricity is utilized by only 4.46 percent of the dwellers while liquefied petroleum gas and oil are used by very few households, 0.60 percent and 0.19 percent, respectively. Most of the households (75.69%) in the urban areas use electricity as their type of lighting facility. About 24.31 percent use kerosene while no household reports using liquefied petroleum gas, oil and other (candle or wax). Meanwhile, rural residents have more access to kerosene accounting for its popularity among the 68.05

percent households; 29.33 percent use others, such as candle or wax; 1.80 percent use electricity; 0.62 percent use liquefied petroleum gas and 0.20 percent use oil (Table 5).

SOURCE AND USE OF WATER SUPPLY

Most households (63.47%) obtain their water supply for drinking from the faucet, community water system. About one-lifth or 20.40 percent utilize water from the spring. A little over one-tenth (10.41%) have dug well as their source of drinking water. The rest are broken down as follows:1.82 percent from tubed/piped deep well; 0.76 percent from tubed/piped shallow well; 0.08 percent from rain and 3.06 percent from lake, river, stream, irrigation, etc. (Table 6). For kitchen use, majority rely on faucet, community water system (63.51%), 20.27 percent from spring, 10.43 percent from dug well, 3.16 percent from lake, river, stream, irrigation, etc., 1.82 percent from tubed/piped deep well, 0.76 percent from tubed/piped shallow well and 0.05 percent from rain. Almost half (49.32%) of the total households use water from faucet, community water system for washing clothes. Other sources include lake, river, etc. (23.77%), spring (18.45%), dug well (5.62%) rain (1.75%), tubed/piped deep well (0.78%) and tubed/piped shallow well (0.31%).

COOKING FUEL

Wood or charcoal being abundant in the province is commonly used by most of the households (92.32%) in Mountain Province. The rest of the households use either kerosene (4.84%), liquelied petroleum gas (1.46%), other (1.28%) or electricity (0.10%). A good number of urban residents cook with kerosene (45.60%) while most of the rural folks use wood or charcoal (94.51%).

TOILET FACILITIES

Sanitation is a deplorable condition in the province with 9.99 percent of the total households having no toilet facilities, 11.23 percent adopting the pail system, 61.72 percent using the open pit and 10.04 percent, the closed pit (antipolo, etc.). Only 7.02 percent of the households have flush or water-sealed toilets with sewer/septic tank (5.01%) and 2.01 percent have water-sealed with depository other than sewer/septic tank. Urban households have better toilet facilities than those in rural areas. Less than two-thirds (63.60%) urban households have water-sealed with sewer/septic tank; 18.00 percent use water-sealed with depository other than sewer/septic tank; 9.86 percent, closed pit (antipolo); 3.94 percent, open pit and 4.60 percent have no toilet facilities. Among the rural households, 2.83 percent have water-sealed with sewer/septic tank; 1.40 percent, water-sealed with other depository; 10.05 percent, closed pit; 63.88 percent, open pit; 11.65 percent, other (pail system, etc.) and 10.19 percent have none (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Owning household appliances has become a luxury rather than a necessity to the households in Mountain Province where 28.23 percent own radios, 0.21 percent have television sets and 0.66 percent have refrigerator or freezer. The easy access of the urban households to electricity enabled them to have a higher proportion of ownership of household appliances. More than two-thirds (67.94%) of the households own radios. 1.97 percent have television sets and 8.54 percent have refrigerator or freezer. Among the rural households, 26.75 percent have radios; 0.15 percent, television sets and 0.38 percent, refrigerator or freezer.
